

Track your sales. **Know your commish.**

Because your spreadsheet held together by prayers and
conditional formatting deserves to retire.

Built by a rep's wife. Because somebody had to fix this.

REPCOMMISH.COM

SOUND FAMILIAR?

Your commission tracking system is held together by vibes.

Spreadsheet Chaos

12 tabs open, 4 different spreadsheets, and a formula that broke three months ago that you're too scared to fix. We've all been there.

Reconciliation Nightmares

A check arrives. Cool. Now spend the next hour matching it to accounts while questioning your career choices. Every hour reconciling is an hour you're not closing.

The Mental Math Era

You know you're owed money. You just can't say exactly how much, from which brand, for which orders. The info exists — it's just scattered across 47 places.

No Big Picture

How's the season going across all your brands? What's your total pipeline? If your answer involves opening 6 files... we need to talk.

THE FIX

One app. All your brands. Zero spreadsheet nightmares.

Think of it as a personal accountant that never sleeps, never miscounts, and never asks for a raise. Add your brands, enter your sales, and always know exactly what you're owed.

Multi-brand dashboard

Order tracking

Auto-calculated commission

Payment tracking

CSV import & export

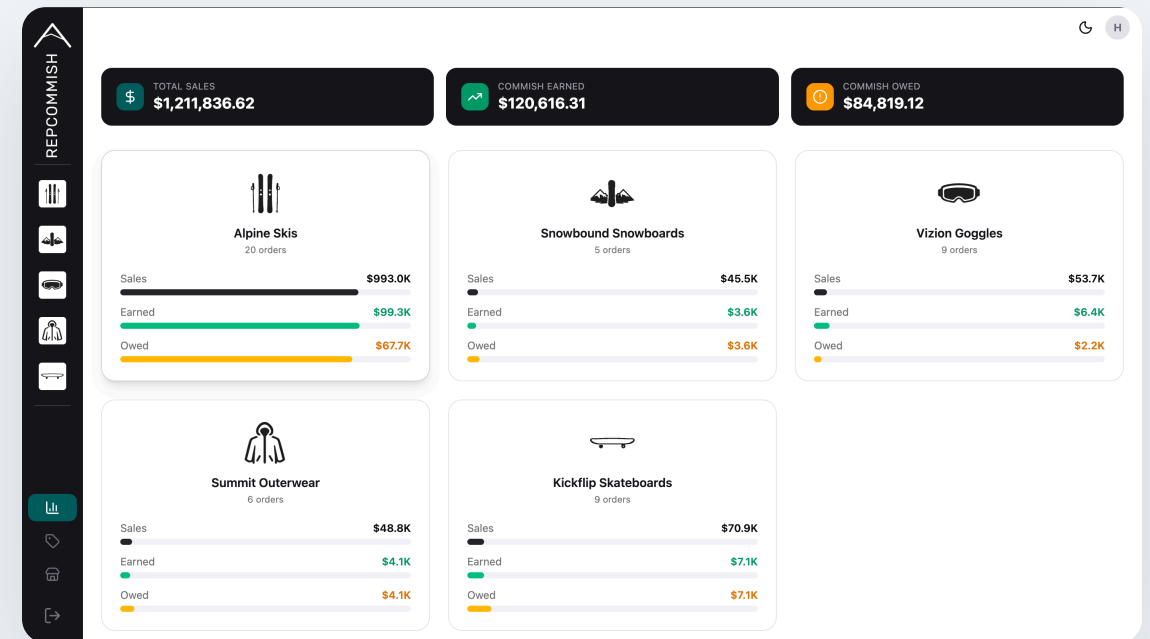

Reports (XLSX + PDF)

DASHBOARD

All your brands. One screen. No more tab-switching like a maniac.

Total sales, commissions earned, and what's owed across every brand you carry. It's the view you've been building in your head but could never get Excel to cooperate on.

- ✓ Cross-brand totals at a glance
- ✓ Commission earned vs. still owed
- ✓ Per-brand cards with progress bars
- ✓ Filter by sale cycle (Winter, Spring, etc.)

COMMISSION

Know what you're owed. Down to the penny.

Your calculator app can finally retire. Commission auto-calculates from your orders and each brand's rates. Track who paid, who partially paid, and who's pretending your invoice got lost in spam.

- ✓ Auto-calculated from order totals
- ✓ Per-brand and per-category rates
- ✓ Paid / Partial / Unpaid at a glance
- ✓ Bulk payment recording + CSV import

BRAND PAGES

Every brand gets its own workspace. Finally, some order.

Sales trackers, commission tracking, to-dos, a notepad, and a calculator — all per brand. Rep 3 brands or 30, everything stays organized. Your brain has enough to remember.

- ✓ Per-brand dashboard with summary cards
- ✓ To-do lists (pin it, drag it, check it off)
- ✓ Custom order types, stages, and items
- ✓ Quick-access brand icons in the sidebar

BUT WAIT, THERE'S MORE

Built for reps, not IT departments.

CSV Import

Bring your existing data in minutes. Upload a CSV or fill it in the app — whatever matches your chaos style.

Reports & Exports

Clean PDFs and Excel reports for your accountant, your taxes, or that brand that keeps asking "can you send that again?"

Account Management

Contacts, notes, order history — all in one place. No more digging through emails to find "what's that guy's number again?"

Invoice & Doc Tracking

Attach invoices, POs, and anything else you'd normally lose in your email. Securely stored and always where you left them.

Dark Mode

For the late-night "let me just check one thing" sessions that turn into two hours. Your eyes will thank you.

Secure & Private

Your data is yours. Row-level security means nobody else can peek at your numbers. Not even us. Pinky promise.

PRICING

Less than a client lunch. Way more ROI.

One plan, everything included. It pays for itself the first time you catch a missing commission.
